## EDITOR'S LETTER

Think of circular knitting as creating a sculptural work of art that morphs and changes as the creation springs to life.

Unlike a static garment made back and forth that must be sewn together before wearing, circular knitting is much more forgiving. The practical nature of knitting in the round allows us to test and make adjustments on the fly.

In this Special Interest edition of *Creative Knitting* magazine, we'll give you the essential tools to get started on your circular knitting journey.

If you're a new or experienced knitter, this issue has something for you, no matter what phase of the process you've mastered. There's always something new to learn when it comes to circular knitting, and you'll find this book to be a constant companion.

The first chapter, Master the Tube, is all about getting in your circular knitting groove with a collection of cowls. It's obvious why so many knitters enjoy knitting in the round rather than back and forth. There's no abrupt stopping and turning, just continuous rhythmic feel-good movements!

In Circular Satchels, you'll find cleverly constructed bags and colorful totes that encourage you to explore circular construction methods on a small scale.

If making a cap suits your fancy, then you'll be pleased with our Hat Making 101 lesson in Heads Up!. The topper is a practical basic that you'll want to make no matter your level of knitting expertise.

If you're ready to get serious about your craft, then it's time to roll up your sleeves with Practical Pullovers. Circular knitting in this way, creates a series of seamless tubes that become your final garment that you can easily try on as it begins to emerge on your needle!

With Casual Cardigans, you'll enjoy the ease of working a garment on one circular needle. These projects are made back and forth, but with just one circular needle, you can easily manage the body of your garment. You'll also prefer using a circular needle for all of your back and forth projects for ease and comfort.

I know this Special Interest issue will be a companion that will remain by your side on your circular knitting journey for years to come!

# Let's Get Started on a Circular Journey

A ball of yellow yarn sits at the top center. A circular knitting needle, made of dark wood or bamboo, is positioned diagonally across the right side. A small section of yellow yarn is knitted onto the needle, forming a small loop.

In this Special Interest Issue, you will learn the basic fundamentals of circular knitting, with each chapter helping you to systematically progress in your skills, much like the construction of a house. First, we start with a solid foundation so you can get your bearings, then we set you free to explore new techniques and construction methods. However, if you're already familiar with circular knitting, then you have the freedom to jump into any project that suits your taste!

## Next Steps

**Tools of the Trade**—Plan ahead for success!

On the next two pages you'll be introduced to the Tools of the Trade, which is our handy guide to help you set yourself up for

success. You'll find a variety of needles, notions and gadgets to make your circular knitting experience more enjoyable.

At this phase, it's a good idea to glance at the materials section of your chosen project and take note

of the needles and notions you'll need. You may notice that you may need both double-point and circular needles, and it's a good idea to collect these items before you cast on so you're not caught off guard later.

## The Techniques

We kick things off with a series of five tutorials, which will walk you step by step through a variety of techniques that apply to circular knitting. One circular needle is commonly used for a standard pullover such as *Edgy Asymmetry*, on page 67, while double-point needles are often used for small-circumference sections such as sleeves. Double-point needles are also called for when working small projects such as fingerless mitts, socks and hats.

*Edgy Asymmetry*, page 67

Once you get your groove on, you may decide that working with double-point needles just isn't your thing. If that's the case, try your hand at using one or two circular needles and the Magic Loop Method. For toe-up socks, we'll introduce you to Judy's Magic Cast-On; when you give it a try, you'll believe in magic!

## Construction Methods

Once you've got the techniques under your belt, and you've

spent time getting familiar with them, we'll dive into the different construction methods that you will find in the chapters that follow. We show you how to knit from the bottom up, from the top down, from side to side and also back and forth on one circular needle. Reasons for working these methods may depend on a few factors:

**Construction**—For example, you may be working a raglan pullover, like *Descending Cables*, on page 79, and, for garment shaping like this, you'll commonly find that working from the top down makes the most sense. One of the biggest benefits of this method is that you can try on your garment as you go, which is a great way to make sure your project fits in every step of the process.

**Ease**—Working from the bottom up is generally an easier way to work because minimal or no shaping is involved until you hit the armholes and/or neckline. The only drawback to this method is that it's harder to try on as you go, but here's a little trick if you've got the patience: If you're working on some circular

*Descending Cables*, page 79

needle, have on hand two additional circular needles that have 24–36-inch cables. Then, divide your stitches in thirds among the three needles. This will spread out your stitches so you can either try the garment on or measure it to make sure you're on track and your gauge works. When you're done, you can simply knit off each of the circular needles until you are back to the one you started with.

**Design**—For example, a pattern may be written from the bottom up if shaping or construction would be challenging or nearly impossible if made from the top down. On the flip side, working side to side (also known as cuff-to-cuff construction for garments) can create an unexpected look in the direction of your knitting, even on the most basic pullovers.

So now it's time to turn the page, collect your tools and start your circular knitting journey! ■

## 6 Reasons Knitters LOVE Circular Knitting

1. Minimal sewing and seaming—less loose ends!
2. Seamless projects allow you to work in rounds with no interruption.
3. Fewer garment pieces to assemble later.
4. When knitting stockinette stitch in the round, you never have to purl.
5. Top-down garments allow you to “try-on-as-you-go.”
6. See your projects come to life right on the needle!

# Circular Knitting *Techniques*

Now, let's dive into learning five useful techniques that apply to circular knitting. In this section, we will provide you with a series of tutorials for each of these techniques so you can decide which one fits best for your chosen project. As you become more experienced, you'll discover that you may favor one technique over another, which is perfectly fine because it's all about finding the method that resonates most with you.

## Overview of the Tools & Techniques

**Double-Point Needles:** These are commonly used for small circumference projects such as socks, fingerless mitts and hats.

**One Circular Needle:** These come in varying cable lengths and can be used for a variety of projects such as hats, cowls, bags and garments.

**Two Circular Needles:** This method is used mostly for small circumference projects and is a great alternative to using double-point needles.

**Magic Loop:** This is a special method that uses one long circular needle to knit projects with small circumferences.

**Judy's Magic Cast-On:** This cast-on technique is used mostly for toe-up socks. When you start this method from the toe, it creates a closed, invisible cast-on.

## How to Work With Double-Point Needles

Double-point needles come in sets of four or five, and the work is divided evenly among three or four needles depending on what your project calls for. Very short (4-inch) needles are available from specialty sources and are often known as glove or finger needles. These are especially useful when working thumbs on gloves or mittens.

If you are new to working with double-point needles, it may feel awkward at first. This is normal and, as with any new endeavor, will go away with time as you become more comfortable manipulating multiple needles.

## Casting On

Cast on  $\frac{1}{3}$  the desired number of stitches onto the first needle.

Holding the second needle parallel and below the first, cast on another  $\frac{1}{3}$  of the stitches. Hold the third needle parallel below the first two and cast on the remaining  $\frac{1}{3}$ . Photo 1 shows 10 stitches cast onto each needle.

If you prefer, you can also cast on all of your stitches onto a straight needle, then transfer the stitches to each separate double-point needle.

## Arranging the Needles

Arrange the needles to form a triangle, with the base of the triangle closest to you and the point facing away. All the stitches should be at the bottom of the needles and should not be twisted. Both the tail end and the end of yarn connected to the skein are at the left end of Needle 3 (see Photo 2).

**Note:** If you're using four needles, arrange the needles to form a square so that the tail end and the end of yarn connected to the skein are at the left end of Needle 4.

Slip the first stitch from Needle 1 and place onto Needle 3. Slip the ending stitch from Needle 3 up and over the stitch just transferred onto Needle 1 to join into a ring.

Using the end of yarn connected to the skein and the fourth (free) needle, knit the stitches on the first needle. When all stitches are on the new needle, the needle that formerly held the stitches now becomes the free needle. Continue turning the work, so you are always working at the base of the triangle. The yarn tail will mark the beginning of Needle 1.

To avoid forming a ladder of larger stitches when you change from one needle to the next, work the first stitch of each needle a bit tighter than usual. Photo 3 shows a cuff being worked in 1x1 rib. Our sample of 30 stitches works out rather nicely with 10 stitches per needle. In 1x1 rib, this means you will always

start a needle with a knit stitch and end with a purl stitch, exactly even with the pattern.

## How & When to Work With One Circular Needle

Circular needles come in a variety of cable lengths and offer much more flexibility and freedom than using strictly double-point needles. They can be used to make small-circumference projects using shorter cable needles (for hats and other projects of similar size), or you can use two circular needles and/or the Magic Loop Method, which we'll get into later. One long circular needle can be used for large-circumference projects such as pullovers, or to make back-and-forth garments since a circular needle can be used to accommodate a large number of stitches and minimize seaming. Circular needles have many uses!

## Types of Circular Needles

Some circular needles are made in the traditional manner, with the cable attached; others are made with interchangeable needles, which allows you to mix and match different cable lengths depending on your projects. See Tools of the Trade on page 10 for more about the types of circular needles that are available. Typically cable lengths start at 12 inches and can go up to 40 inches or more. A popular cable length for a hat is 16 inches. Turn to page 46, where we'll walk you step by step through your first hat.

## Cable Lengths

Circular needle lengths of around 24 inches are the typical length that you'll see recommended for the creation of pullovers made in the round, such as Comfy & Casual on page 62. The suggested length is important to pay attention to so you can ensure that you have a cable that is long enough to accommodate the number of stitches called for in your pattern. If your cable length is too long, then it will stretch out your work. If it is too short, your work will be bunched up.

## Working Back & Forth

You'll also see in this issue a selection of cardigans that are made using one long circular needle. The reasons for this are twofold: First, the body can be made in one piece, which avoids seaming, and second, the circular needle accommodates the large number of stitches being worked.

Today, many knitters choose circular needles for all of their projects, including those made flat, simply for comfort and ease.

## Casting Onto a Circular Needle

Typically, you would cast on as for straight needles, but there are some additional things to bear in mind when you are working in the round.

**Step 1:** After you cast on your last stitch, lay your needle down flat and make sure the cast-on edge faces to the inside around your entire needle.

**Step 2:** To join for working in the round, hold the needle facing you with the tail on the left needle and the working yarn on the right needle.

## TIP

To keep your cast-on facing inward, place clothespins along the edges of your needle at three or four different points around while you join for working in the round.

**Step 3:** Slip the first stitch from the left needle over to the right needle, and then slip the second stitch on the right needle over the stitch you just placed in front of it to the left needle. Basically, you simply switched the position of these stitches. What this does is create a nice neat join at the beginning of the round. Sometimes, when a join like this is not worked, a gap is left which does not look so pretty! Place a marker to remember the beginning of your round and work as the pattern instructs.

## Working With Two Circular Needles

One reason for using two circular needles is to work small-circumference projects such as socks. It's just another method for achieving the same result that you would with double-point needles and is usually a matter of preference.

## How to Get Started

Cast on the required number of stitches onto a circular needle. Slip half of the stitches to a second circular needle. Needle 1 holds the first group of stitches and Needle 2 holds the rest of the stitches.

**Step 1:** Slide all stitches to other end of needles, making sure that Needle 2 is on top and Needle 1 is on the bottom.

**Step 2:** Slip the first stitch from Needle 1 and place onto Needle 2. Slip the last stitch from Needle 2 up

and over the stitch just transferred onto Needle 1 to join into a ring.

**Step 3:** Pull Needle 1 so the stitches rest on the cable.

**Step 4:** The working yarn is on Needle 2, ready to work. Pick up the other end of Needle 2 and work across all stitches.

**Step 5:** Turn the work so Needle 1 is ready to work. Pull Needle 2 so stitches rest on cable. Pick up opposite end of Needle 1 and work across all stitches.

Continue in this manner until desired length is reached.

## The Magic Loop Method

This method of working in the round uses one long circular needle, ideally one with a very flexible cable. It is very similar to working with two circular needles but many knitters prefer it to working with two needles because it eliminates the distracting loose ends of the second circular needle. Once you master this technique, it's a great solution when working on small-circumference projects.

Cast on or pick up the required number of stitches onto a 29-inch or longer circular needle. Slide the stitches to the cable portion of the needle. Pinch the cable in half as shown below and then pull to create a large loop. Arrange half the stitches on one needle tip and half on the other.

## TIP

After cast-on row: refer to Working With Two Circular Needles to join the first and last stitch.

### (Magic Loop continued):

Follow these three easy steps:

**Step 1:** The photo on previous page shows how your stitches should look after you have distributed them on the two parts of the needle. The points of the needle and the tail from the cast-on row are facing to the right and the cables are on your left.

**Step 2:** The next step, as shown on previous page, illustrates how to begin working the first round: Hold the needle in your left hand, and pull out the needle that holds the tail end. The stitches that were on the needle point are now resting on the cable.

Begin working the stitches that are still on the opposite needle point as if you were working on straight needles.

**Step 3:** At the end of the row, simply turn the work around and reposition the stitches as shown. Once again, the needles are pointing to the right and the cable loop is to the left. Continue to work in this manner until desired length is reached.

The example below shows how the work will appear on the needle as the work gets longer.

### Judy's Magic Cast-On

Invented by Judy Becker, this style of cast-on is a sock knitter's best friend, especially if you love to make toe-up socks. Socks are not the only thing you can make with this type of cast-on; in fact, you can use this cast-on for any circular project that forms a closed cast-on, including the base of a bag, closed tubes and digital-device cases such as the one featured in the Annie's Video Class *Circular Knitting Essentials* with instructor Patty Lyons.

To work this cast-on you'll need a 40-inch circular needle. Follow these simple instructions to practice Judy's Magic Cast-On:

**Step 1:** Holding needle in right hand with ends of needles parallel to each other and tips facing to the left (one needle end will be on top of the other), drape yarn over the top of needle with the yarn from the ball to the back.

**Step 2:** Put working yarn over thumb and tail over index finger of left hand.

**Step 3:** Bring both needle ends over and behind the top of strand, catching the yarn with the bottom needle. There is now one stitch on the top needle and one stitch on the bottom needle.

**Step 4:** Now bring both needle ends on top of bottom strand and bring yarn between both needle ends and over the top of the upper needle tip. There are now two stitches on the top needle.

Repeat Steps 3 and 4, adding one more stitch on each needle end with each repeat.

To really see Judy's Magic Cast-On in action, watch a short lesson with Patty Lyons, brought to you by Annie's Video Classes, by typing this link into your internet browser: <https://www.anniescatalog.com/detail.html?code=121108>. # Circular Knitting *Construction Methods*

OK, so now you've got some great skills under your belt and understand the various techniques for working with circular needles. Next, we'll dive into four different construction methods that you'll encounter with circular knitting.

## Overview of Construction Methods

**Bottom-Up:** This method is considered by many knitters to be the simplest because bottom-up construction starts at the bottom of the garment, which usually requires very little, if any, shaping.

**Top-Down:** With this method, your shaping elements have been determined, allowing you to try on as you go, so you can lengthen your sweater or make it slightly shorter, if preferred.

**Side-to-Side:** This method is also known as cuff-to-cuff construction. The direction of your knitting starts from one sleeve or side and is usually worked across the body.

**Back-and-Forth:** For example, cardigans which are worked back and forth can be made on one long circular needle in order to keep all the parts on one needle and minimize seaming.

## Now, let's dig into the details ...

### What Exactly Does Knitting From the "Bottom-Up" Mean?

Working from the bottom up means you will be knitting from the hem and working your way up. Using the example of a circular pullover, you would start at the cast-on edge and knit all the way up to the neckline of the garment.

### Master the Tube!

The best way to visualize your garment is to imagine a cylindrical tube. Knitting in the round is a seamless method of working a circular garment like a pullover. In Master the Tube, we introduce you to a collection of cowls so you don't need to concern yourself with shaping elements but, instead, focus strictly on finding your rhythm when working on a circular needle.

### Reading the Bottom-Up Schematic

A schematic is drawn based on the direction of knitting. In this case, you can see that this pullover is worked from the bottom of the garment. Directional arrows indicate that the piece is knitted from the bottom up to the armhole, with the sleeves knitted in the round and then joined to the body. All the pieces are then joined and knit together to form the yoke, ending with the neck.

### Take It From the Top Down

Since the work is begun from the neck opening, the most crucial shaping sections, such as armholes and bust, are worked first, long before the waist shaping. This saves you from the possible nightmare of knitting flat pieces and seaming them together only to realize that your waist shaping was incorrect!

With the top-down method, your shaping elements have been determined, allowing some creative license to try the piece on as you go and to make changes like adjusting the length of your sweater.

### The Top-Down Schematic

With top-down projects, you will notice that the schematic is positioned upside down, with the neck as the cast-on round. As shown in the schematic, after casting on for the back neck you will work the shaping for the fronts, back and sleeves at the same time that you are shaping the neckline.

### Shaping Elements

Circular knitting takes on a 3-D form, unlike static back-and-forth knitting. There are many ways to work a circular design because of its sculptural aspects. For example, fitted sections of the waist and bust can be worked in a simpler way than one would do with a project knitted flat. With top-down knitting, you have ultimate control because you can literally try on a garment while you work, to ensure you've got the proper fit and gauge.

### Knitting in New Directions: Working Side to Side

We've addressed many of the fundamentals of knitting on circular needles, and now it's time to stretch your imagination and view your projects from a new perspective.

With side-to-side knitting, also known as cuff-to-cuff construction, the direction of your knitting starts at one sleeve or side and is usually worked across the body. To better understand this, you'll see that the schematic shows the cast-on edge starting at the left cuff and the knitting follows across the body to right cuff, as shown with arrows.

**Note:** Blue arrows indicate directions of work for bottom-up version.

Example of the Bottom-Up Schematic

Example of the Top-Down Schematic

**Note:** Arrow indicates direction of knitting.

Example of the Side-to-Side Schematic

To make a neater join, cast one more stitch than called for in your pattern onto your circular needle, or double-point needles, and then slip the first stitch from the left-hand needle onto the right-hand needle. Lift the next stitch on the right-hand needle and place it over the slipped stitch. This creates a smooth cast-on edge.

In many respects, we can compare the benefits of this method of knitting to working in the round because the entire garment is worked in one piece. It makes the process fluid and less static than other forms of back-and-forth knitting. Additionally, a back-and-forth, cuff-to-cuff garment is more dynamic than its traditional “in pieces” counterpart because you can try on the piece as you go rather than making four separate body units and hoping for the best. Another benefit to working from cuff to cuff is that the stitch and color patterns are vertical on the body instead of horizontal, creating a nice slimming effect.

### Back & Forth for Comfort, Ease & Minimal Seaming

When first knitting back and forth on a circular needle, you may wonder how this is possible, considering a circular needle is traditionally intended for working a project in one continuous circle, such as a hat. The trick is to imagine that your circular needle is actually a set of straight needles. After working across a row, simply turn the needle around. The needle in your right hand now becomes the working needle.

### Circular Vs. Straight Needles

The reasons are many for opting to use one circular needle over two straight needles. Here are a few to entice you:

- Circular needles are easy travel to travel with. They coil up in your knitting bag, which is a nice feature, especially on a cramped plane. The person in the seat next to you will appreciate not being poked by the ends of your needles!

- Whether you are at home or out and about, you’ll have no dangerous, pointy straight needles protruding out of your knitting bag.
- Your stitches can “stretch” out, giving you the ability to see your project as you go.
- When knitting a large number of stitches, the weight of the knitting is evenly distributed on a circular needle.
- Stitch patterns flow evenly around the garment—they are not interrupted by seams.

In the following chapters you’ll see many familiar styles, but with a new spin: Instead of working in the traditional way, by first working the back of the garment, then the front and finally the sleeves, we suggest doing it all at once on a nice, long circular needle. For example, you may work a cardigan starting from the bottom edge, working back and forth from the left front, across the back, ending at the right front edge, all the while keeping all the garment parts neatly on one needle.

Without having to deal with side seams, sewing is kept to a minimum. Working a garment in one piece may sound intimidating, but we promise you’ll find it to be an easy and satisfying way to knit. The designs presented are both unique in construction and a breeze to make. You’ll find that working on a circular needle brings fluidity to your back-and-forth projects, creating a natural rhythm to your knitting.

### The Back & Forth Schematic

A basic cardigan is worked flat as one unit, regardless if you use a circular needle or straight needles. In this schematic, you can see that the fronts, back and armholes are worked as one complete unit. The sleeves are created separately and can be worked in the round to make your garment virtually seamless, or flat depending on the pattern instructions.

Now, turn the page and get ready to cast on for your first circular knitting project! ■

# Master *the* Tube

In this chapter, we ease you into working in the round with a lovely collection of stylish cowls. You won't need to concern yourself with shaping elements; just focus on finding your rhythm while working on a circular needle. Simple tubes, like those you'll find in this chapter, are a great starting point, and later, you can progress to projects that include even more tubes, such as sleeves for a pullover.

outer flap, pick up and knit 16 sts  
below purl row along top outside  
edge of bag, turn bag with lining  
facing, pick up and knit 12 sts below  
purl row along lining—28 sts.

Divide sts with 8 sts each on N1  
and N2 for top of strap, and 6 sts each  
on N3 and N4 for bottom of strap. Pm  
for beg of rnd and join.

**Rnds 1–12:** N1 and N2: work Bramble

of bag, to the right-hand side of  
flap, corresponding with position of  
beg of strap.

Turn bag with WS facing. Lay bag  
flat with flap centered and straps  
at each side. Whipstitch cast-on  
edge closed.

Place locking markers along  
bottom edge and sides of bag, each  
approx 1½ inches from bottom  
corners (see Figure 1). Open out 1  
corner and fold with RS tog so that  
bottom seam and side of bag are

# Heads Up!

It's easy to see why hats are a popular circular knitting project. They require minimal time, minimal sewing and minimal skeins of yarn. This chapter opens with a special hat-making tutorial for our Basic Rolled Brim Beanie, found on page 49 . We walk you through every step, from casting onto a 16-inch circular needle through fastening off your final few stitches. This basic topper is perfect for anyone on your gift-giving list—including yourself! If you feel adventurous, you can dress it up for her with some embroidered accents. For him, explore more colorwork using the methods used in the Circular Satchels chapter to give it a bold look. As you progress in your hat-making skills, you might like to explore a method of circular knitting from the center out with the Falling Leaves Beret on page 54.

# Hat Making 101: *Make Your First Hat*

By Carri Hammett

To make a simple hat you will need a 16-inch circular needle, a set of double-point needles in the same size, a round stitch marker and a blunt tapestry needle.

Using the circular needle, cast on the number of stitches called for in the pattern. The most important part of joining the stitches in the round is a warning you will see in most hat patterns that you should be “careful not to twist the stitches.” The cast-on stitches must not spiral around the needle. In order to avoid this problem, always make sure the bumps at the bottom of the cast-on stitches are lined up facing the center of the circle formed by the needle as shown below.

After checking that the stitches are properly aligned, hold the needle tips so the first stitch that was cast on (the slip knot) is on the left-hand tip and the last stitch (connected to the working yarn) is on the right-hand tip. Before working the first stitch of the first round, put a stitch marker on the right-hand tip.

As shown in the photo above, insert the right-hand tip into the first stitch on the left-hand tip and use the working yarn to make a stitch, thereby joining the stitches and making a circle. On this first stitch, pull the yarn firmly to avoid a gap. Continue knitting around

If you're new to circular knitting or just love the idea of knitting hats, then this is the place to get started. You'll build your skills while working on a small scale, which is less overwhelming than jumping into a garment.

until you reach the stitch marker, which indicates that you have completed one round. Slip the marker from the left-hand tip to the right-hand tip and continue knitting. The marker is known as the beginning-of-round marker and each time you knit to it, one round has been completed.

Continue knitting around and around until the body of the hat (measured from the cast-on edge) is the length specified by the pattern as the point to begin shaping the crown. The crown shaping is accomplished by dividing the stitches into wedges or sections (often marked) and gradually decreasing the number of stitches per section to form a tapered top. As the stitch count decreases, the circumference of the hat becomes smaller and the stitches can no longer be stretched around the circular needle. At that point, the stitches must be transferred

to double-point needles, as in Photo 1, to finish the remainder of the crown. Knit the stitches off the circular needle and onto four double-point needles. If possible, the number of stitches should be divided evenly, and the beginning-of-round marker should be in the middle of one of the needles.

Once all the stitches have been transferred, use the fifth needle to continue knitting, as illustrated

in the photo below. Knit all the stitches from the first needle onto the free needle. When that needle is empty, it becomes the new free needle and is used to knit the stitches on the next needle, and so on around the hat.

Upon reaching the final round, as shown below in Photo 2, just a few stitches will be left. Cut the working yarn, leaving a tail at least 10 inches long, and thread it on a blunt tapestry needle. Thread

the tail through each of the stitch loops on the top of the hat in the same order that you knit them.

Pull the tail firmly to close the hole in the top of the hat. Pass the tail (still threaded on the needle) to the inside of the hat and, after giving it one final tug, weave it into the stitches on the wrong side of the hat to secure. ■

**Photo 1**

**As the stitch count decreases, transfer your stitches to double-point needles and arrange your stitches evenly on 4 needles.**

## Pattern Notes

Hat is worked from bottom to top, beginning with the earflaps (worked flat) which are joined to work the rest of the hat in the round.

To minimize color jog at color changes, use Jogless Stripes technique.

Experiment with different yarn colors to make this as understated or as wild as you want.

## Earflap

### Make 2

With dpns and A, cast on 9 sts.

**Row 1 (RS):** Knit.

Work even in St st until flap measures 3 (3¼, 3½) inches.

Cut yarn and set aside on spare dpn.

## Body

With larger circular needle and A, cast on 30 (32, 34) sts.

With RS facing, knit across sts of first earflap. Turn work to WS and using cable cast-on (see page 128), cast on 8 (9, 10) sts, pm, cast on 8 (9, 10) sts. Turn work to RS and knit across sts of 2nd earflap—92 (100, 108) sts with marker at center back of hat.

Change to C; knit 10 rnds. Cut C.

Change to A; knit 3 rnds. Cut A.

Change to B; work even (if necessary) until hat measures 4¾ (5¼, 6) inches from cast-on edge.

## Shape Crown

**Note:** Change to dpns as needed.

**Rnd 1:** Knit and dec 4 sts evenly around—88 (96, 104) sts.

**Rnd 2:** [K9 (10, 11), k2tog, pm] 8 times—80 (88, 96) sts.

**Rnd 3:** Knit.

**Rnd 4:** [Knit to 2 sts before marker, k2tog] 8 times—72 (80, 88) sts.

Rep [Rnds 3 and 4] 7 (8, 9) times, then work Rnd 3—16 sts.

**Next rnd:** Removing markers, [k2tog] 8 times around—8 sts.

Cut yarn, leaving a 10-inch tail. Using tapestry needle, thread tail through rem sts and pull tight to close top of hat. Pass tail to inside and weave in securely.

Steam hat to help rolled edges lie flat.

## Finishing Edging

With RS facing, using smaller circular needle and C and beg at center back, pick up and knit 1 st in every st along cast-on edges, and 3 sts for every 4 rows along sides of earflaps. Do not join.

Turn and knit 1 row; turn and bind off all sts.

Cut yarn and sew edge sts tog.

## Top Braid

Cut 6 (24-inch) strands of C. With tapestry needle and 3 strands held tog, thread yarn through top of hat so there are 12 inches on each side; rep with 2nd group of 3 strands, so that 2nd group is crosswise to first. Tie all strands in a single knot close to top of hat.

Divide into 2 groups of 6 strands and make 2 braids approx 6 inches long. Secure ends with an overhand knot and trim ends even.

## Earflap Braids

Cut 6 (30-inch) strands of C. Fold strands in half and use crochet hook to pull loop through center bottom of earflap from WS to RS. Pull all strands through loop and pull snug. Using all 12 strands, make a braid approx 8 inches long, then secure as above.

Rep for 2nd earflap.

## Special Techniques

**Starting New Colors:** Stripes add interest and appeal to hats. The width of the stripes (number of rnds) dictates how the yarn is handled when it isn't being used. When you temporarily stop working with 1 color in order to add a stripe in the other color, it is not necessary to cut the old yarn if you will be working with that color again no more than 4 rnds later. Simply park the yarn at the beg of the rnd (leave it hanging) until you are ready to use it again. When you finish making the stripe with the new color and start knitting again with the old

color, simply pull the yarn up from where it was parked and start knitting again. This is known as "carrying the yarn." The trick when starting the yarn again is to pull it firmly enough to close the last st where you left off using the color but not so tightly that you cause the knitting to pucker.

If you will be working more than 4 rnds before going back to the other color, it is best to cut that yarn when you are done with it and join a new end of the color when needed. This will leave tails that will need to be woven in, but the overall look is much neater than carrying the yarn up between wide stripes. When adding or cutting yarn, be sure to leave a tail at least 8 inches long for weaving in.

**Jogless Stripes:** When knitting a hat in the rnd you are, in effect, making a spiral. This means that the last st of a rnd is 1 st higher than the first st of that rnd. This creates a jog in the stripes that some knitters find unattractive. To minimize this effect, use the Jogless Stripes technique, working the first and 2nd rnds of every new stripe as follows:

**Rnd 1:** Change to new color and knit around.

**Rnd 2:** Slip first st pwise, then knit around.

## Pattern Notes

Change to double-point needles when necessary.

If using double-point needles for the entire hat, you will need a set of 5 smaller double-point needles.

## Hat Body

Using smaller circular needle and A, cast on 88 (100, 108) sts; mark beg of rnd and join, being careful not to twist sts.

Work 7 rnds in 2x2 rib.

**Next rnd:** Change to larger needle; knit and inc 2 (0, 2) sts evenly around—90 (100, 110) sts.

Knit 3 rnds.

## Stripe Pattern

**Note:** Remember to cut the yarn or carry it up between stripes depending on number of rnds in the following stripe. If desired, use the Jogless Stripes technique.

With B, knit 8 rnds.

With A, knit 3 rnds.

With B, knit 4 rnds.

With A, knit 4 rnds.

With B, knit 2 rnds.

## Sizes Medium & Large Only

Rep [last 6 rnds] (once, twice).

## All Sizes

With A, work even until piece measures approx 4½ (5¼, 6) inches and, on last rnd, dec 2 (4, 6) sts evenly around—88 (96, 104) sts.

## Crown

**Set-up rnd:** \*K9 (10, 11), k2tog, pm; rep from \* around—80 (88, 96) sts. Knit 1 rnd.

**Dec rnd:** \*Knit to 2 sts before marker, k2tog; rep from \* around—72 (80, 88) sts.

Rep Dec rnd [every other rnd] 8 (9, 10) times, removing all markers on last rnd—8 sts.

Cut yarn, leaving a tail at least 10 inches long. Thread tail through rem sts and pull tight to close hole in top of hat. Weave in tail on WS.

Weave in all ends. Lightly steam-block. ■

# *Practical* Pullovers

Now that you've explored several circular concepts, it's time to journey into garment creation and explore the construction methods on the following pages. We'll journey into making bottom-up pullovers, which offer the easiest starting point; top-down pullovers, which you can try on as you go to ensure proper fit and gauge; and side-to-side pullovers, which change the direction of your knitting and add visual interest to even the most basic pullovers, as you'll see with the Vina Side-to-Side Top on page 69. The benefits of creating garments in the round are many, and when you make your first circular pullover, you may wonder why you waited so long.

## Pattern Notes

Pullover is worked in the round to

Work armhole decreases in  
pattern as follows: Work k1, work  
right-slanting decrease (k2tog if 2nd  
stitch of decrease is a knit stitch or  
p2tog if 2nd stitch is a purl stitch) at  
beginning of row; work left-slanting  
decrease (ssk if first stitch of decrease  
is a knit stitch or ssp if first stitch is a  
purl stitch), k1 at end.

The increases in the charts (Rows  
37–42) will tend to draw the armhole  
edge into a curve. When measuring  
the armhole depth, measure from  
the center of the piece and not at the  
armhole edge.

The bodice is worked in 2 pieces (front and back) for the length of the neck opening, and then the pieces are rejoined for the left shoulder. **Row/Rnd 2:** Knit the purl sts and purl the knit sts.

## Pattern Notes

This sweater is worked from side to side; therefore, row gauge is important to the finished measurements of the garment.

A circular needle is used to accommodate large number of stitches. Do not join; work back and forth in rows.

All increases and decreases are worked 1 stitch from the edge.

Use Make 1 (M1) increase after first stitch and before last stitch of increase rows.

Decrease on right-side rows as follows: K1, k2tog at beginning of row and ssk, k1 at end.

Decrease on wrong-side rows as follows: P1, ssp at beginning of row and p2tog, p1 at end.

When changing colors in a row, bring new color under previous color to twist yarns and avoid holes.

## Left Sleeve

With longer size 7 circular needle and B, cast on 72 sts.

Work 7 rows in Seed St, ending with a RS row.

Purl 1 row; cut B.

Join C; beg with a knit row (RS), work in St st until left sleeve measures 8 inches, ending with a WS row.

Place a marker at each end of last row worked.

Inc 1 st at each end of next 10 rows; cut C—92 sts.

Join A, inc 1 st at each end of next 19 rows—130 sts.

Purl 1 row.

## Front & Back

Cast on 35 sts at beg of next 2 rows—200 sts.

**Row 1 (RS):** With C, cast on 36 sts; sl 1 pwise wyif, [p1, k1] twice, k31, pm; with A, knit to end of row—236 sts.

**Row 2 (WS):** With C, cast on 36 sts; sl

1 pwise wyif, [p1, k1] twice, p31, pm; with A, purl to marker; with C, purl to last 5 sts, work 4 sts in Seed St, k1-tbl—272 sts.

**Row 3:** With C, sl 1 pwise wyif, work 4 sts in Seed St, knit to marker; with A, knit to marker; with C, knit to last 5 sts, work 4 sts in Seed St, k1-tbl.

**Row 4:** With C, sl 1 pwise wyif, work 4 sts in Seed St, purl to marker; with A, purl to marker; with C, knit to last 5 sts, work 4 sts in Seed St, k1-tbl.

Continuing in established pat, work 22 (28, 36, 42, 48, 56) rows, ending with a WS row.

### Shape Back Neck

**Division row (RS):** Work in pat across 136 sts, turn, placing rem sts on holder or spare needle for front.

Dec 1 st at neck edge [every row] 3 times—133 sts.

Work 42 rows even, ending with a WS row. Cut A.

**Next row (RS):** With C, work in pat to marker; with B, knit to neck edge.

**Next row:** With B, purl to marker; with C, work in pat to end of row.

Work 14 rows even, ending with a WS row.

Inc 1 st at neck edge [every RS row] 3 times, ending with a RS row—136 sts.

Cut yarn and leave sts on spare needle.

### Shape Front Neck

With RS facing, work in pat across 136 sts on holder for front.

Dec 1 st at neck edge [every row] 12 times—124 sts.

Work 33 rows even, ending with a WS row. Cut A.

**Next row (RS):** With B, knit to marker; with C, work in pat to end of row.

**Next row:** With C, work in pat to marker; with B, purl to end.

Work 5 rows even, ending with a RS row.

Slipping the first stitch of every row before beginning the seed-stitch border will create a smooth appearance to the hemline of the garment.

The excellent yardage of the 100-gram ball means that “part” balls do not need to be wound off for the color-block panels. Use a new ball for each.

Because the yarn is constructed with a loose twisting of the fibers, when blocking, pin to the finished measurements and lightly steam-block to avoid a matted finished appearance.

Inc 1 st at neck edge [every row] 12 times, ending with a RS row—136 sts.

**Joining row (WS):** Work in pat across all front and back sts—272 sts.

Work 23 (29, 37, 43, 49, 57) rows even, ending with a RS row.

Bind off 36 sts at beg of next 2 rows, and then 35 sts at beg of following 2 rows; cut C—130 sts.

## Right Sleeve

Continuing in St st with B only, dec 1 st at each end of next 19 rows; cut B—92 sts.

Join C; dec 1 st at each end of next 10 rows, placing markers at each end of last row—72 sts.

Work even until right sleeve measures 7 inches from markers, ending with a RS row; cut C.

Join B; purl 1 row.

Work 7 rows in Seed St, ending with a RS row.

Bind off all sts in pat.

## Finishing

Weave in ends.

Block piece to finished measurements.

## Cowl Collar

With RS facing and using size 6 circular needle and A, pick up and knit 117 sts evenly around neck opening; pm and join.

Work in St st (knit every rnd) until collar measures 2 inches.

Change to shorter size 7 circular needle; work until collar measures 5½ inches.

Change to size 8 circular needle; work until collar measures 9 inches. Work 4 rnds in Seed St. Bind off all sts loosely in pat. Sew side and sleeve seams. ■

In order to achieve a shaped back neckline, a portion of the yoke on the top-down version is worked back and forth using short-row shaping. Because this piece is knit from the top down, it allows you to adjust the pullover's length as desired. To lengthen, simply continue the main body, following the Sleeve Stripe until the desired length is reached, and then work the turning round and hem.

**Notes:** Red arrows indicate directions of work for top-down version. Blue arrows indicate directions of work for bottom-up version.

# Casual Cardigans

Here's one of the biggest reasons we love making cardigans on a circular needle—minimal seaming and sewing; all the body parts fit nicely on just one needle. The other big benefit to working a cardigan on a circular needle is to accommodate a large number of stitches. Imagine working just the back portion of your garment on one straight needle—you'd need some nice biceps for that! Circular needles also make flat knitting more convenient so you can easily inspect your stitches when they are stretched across the cable of your needle as you work. This provides you with a clearer perspective on how your garment is shaping up.

This on-trend, easy-to-wear cardigan offers two construction options: Create your sleeves back and forth on one circular needle and sew the side seams closed, or if your goal is to minimize sewing, make the sleeves in the round to the cap.

### Pattern Notes

The cardigan begins with a bottom band which is worked in two halves that are grafted together at the ends. A portion of the stitches for each half are placed on hold for the front bands while the remaining stitches are worked for the main part of the band. Once the halves are complete and joined together, stitches are picked up across the top side edge of the band, and the body is worked in 1 piece to the armholes, then fronts and back are worked separately to the shoulders.

There are two options for the sleeves; you may either work them in the round or back and forth in rows. Both options are worked from cuff to cap, which is worked back and forth in both versions, and then sewn into the armholes.

When shaping armholes and sleeve cap, work decreases as follows: Work k1, ssk at beginning of right-side rows and k2tog, k1 at end. Work p1, p2tog at beginning of wrong-side rows and ssp, p1 at end.

Continue in pat until piece  
measures 6½ (7, 7½, 8¼, 9¼) inches  
from front/back cast-on edge, ending  
with Row 2, 4 or 6.

### Shape Neck

Bind off.

## Left Front

Using long-tail cast-on and smaller needles, cast on 86 (89, 92, 94, 94) sts. Knit 6 rows.

## Shape Neck

**Next row (RS):** Knit across front, cast on 6 (7, 7, 8, 8) sts, with RS facing knit across back from neck edge to lower edge—180 (187, 194, 201, 201) sts.

Knit 2 rows.

Bind off all sts loosely kwise on WS row.

## Belt

With smaller needles, cast on 200 sts, knit in garter st for 2 inches.

Bind off all sts. ■

When working the row immediately following the large-needle row, be sure not to pull the yarn too tight as you begin this row with the smaller needle. Doing so will make the selvage stitches on the large-needle row shorter, which will not allow the jacket to hang smoothly when seams are sewn. Also, do not sew seams too tight. Sew a few stitches, and then tug the seam gently to allow it to lay flat.

## Pattern Notes

This raglan cardigan is worked from the yoke down. After the sleeves are separated from the body, the body is worked down. The sleeves are worked in the round from the underarms.

Yoke and body are worked back and forth; a circular needle is used to accommodate the large number of stitches.

For sleeves, change to double-point needles when stitches no longer fit comfortably on circular needle.

If desired, isolate Border pattern by placing markers that are a different color from raglan markers between Border pattern and Seed Stitch.

Edge stitches are worked in garter stitch throughout.

Raglan seam stitches are worked in stockinette stitch.

## Yoke

Close your other fingers over the strands to hold them against your palm. Spread your thumb and index fingers apart and draw the yarn into a V.

Place the needle in front of the strand around your thumb and bring it underneath this strand. Carry the needle over and under the strand on your index finger.

Draw the strand through the loop on your thumb. Drop the loop from your thumb and draw up the strand to form a stitch on the knitting needle.

Repeat until you have cast on the number of stitches indicated in the pattern.

## Knit (k)

\* GUIDELINES ONLY: The above reflect the most commonly used gauges and needle sizes for specific yarn categories.

\*\* Lace weight yarns are often knitted on larger needles and hooks to create lacy, openwork patterns. Accordingly, a gauge range is difficult to determine. Always follow the gauge stated in your pattern.

## Basic Stitches

### Garter Stitch

When working back and forth in rows, knit every row. When working in the round, knit one round, then purl one round.

### Stockinette Stitch

When working back and forth in rows, knit right-side rows and purl wrong-side rows. When working in the round, knit all rounds.

### Reverse Stockinette Stitch

When working back and forth in rows, purl right-side rows and knit wrong-side rows. When working in the round, purl all rounds.

### Ribbing

Ribbing combines knit and purl stitches within a row to give stretch to the garment. Ribbing is most often used for the lower edge of the front and back, the cuffs and neck edge of garments.

The rib pattern is established on the first row. On subsequent rows, the knit stitches are knitted and purl stitches are purled to form the ribs.

### Gauge

The single most important factor in determining the finished size of a knit item is the gauge. Although not as important for flat, one-piece items, it is important when making a clothing item that needs to fit properly.

Before beginning, it is important to make a gauge swatch about 6 inches square using the recommended stitch pattern(s) and needles. If the project that you are making will be worked in the round, work your gauge swatch in the round as well. Wash and block the swatch.

When the blocked swatch is dry, count the number of stitches and rows in the center 4 inches. If there are fewer stitches and/or rows than indicated in the Gauge section in the pattern, your needles are too large. Try another swatch with smaller needles. If there are more stitches and/or rows than indicated in the Gauge section in the pattern, your needles are too small. Try another swatch with larger needles.

Continue to adjust needles until correct gauge is achieved.

## Reading Pattern Instructions

Before beginning a pattern, look through it to make sure you are familiar with the abbreviations and techniques that are used.

Some patterns may be written for more than one size. In this case the smallest size is given first and others are placed in parentheses. When only one number is given, it applies to all sizes.

You may wish to highlight the numbers for the size you are making before beginning. It is also helpful to place a self-sticking note on the pattern to mark any changes made while working the pattern.

## Measuring

To measure a piece, lay it flat on a smooth surface. Take the measurement in the middle of the piece. For example, measure the length to the armhole in the center of the front or back piece, not along the outer edge where the edges tend to curve or roll.

## Working From Charts

A chart will often be provided as a visual representation of a color or stitch pattern. On the chart each cell represents one stitch. A key is given indicating the color or stitch represented by each color or symbol in the cell.

The row number is at the edge of the chart where that row begins. If the number is at the right, the row is a right-side row and the chart row is read from right to left; if the number is at the left, the row is a wrong-side row and the chart row is read from left to right.

When working in rounds, every row on the chart is a right-side row and is read from right to left.

## Use of Zero

In patterns that include various sizes, zeros are sometimes necessary. For example, k0 (0, 1) means if you are making the smallest or middle size, you would do nothing, and if you are making the largest size, you would k1.

## Knitting Needles Conversion Chart

| U.S.        | 0 | 1  | 2  | 3  | 4  | 5  | 6 | 7  | 8 | 9  | 10 | 10½ | 11 | 13 | 15 |

| Metric (mm) | 2 | 2¼ | 2¾ | 3¼ | 3½ | 3¾ | 4 | 4½ | 5 | 5½ | 6  | 6½  | 8  | 9  | 10 |

## Provisional Cast-On

The provisional cast-on has a variety of uses. It starts with a crochet chain on a crochet hook about the same size as the knitting needle. A chart is given below of crochet hooks that correspond most closely to knitting needle sizes.

| Crochet Hook | Knitting Needle |
|--------------|-----------------|
| E            | 4               |
| F            | 5               |
| G            | 6               |
| H            | 8               |
| I            | 9               |
| J            | 10              |
| K            | 10½             |

To work this type of cast-on, start with a crochet chain one or two stitches more than the number of stitches to be cast on for the pattern you are working. Since the edge is removed to work in the opposite direction the chain should be made with a contrasting color.

Once the chain is completed, with a knitting needle, pick up and knit in the back bar of each chain until the required number of stitches is on the needle. Continue to work the pattern as given in the instructions.

Instructions then indicate that the provisional cast-on be removed so the piece can be worked in the opposite direction. In this case, hold the work with the cast-on edge at the top. Undo one loop of the crochet chain, inserting the knitting needle into the stitch below the chain. (This stitch is on the original first row of knitting.) Continue to undo the crochet chain until all the stitches are on the needle. This provides a row of stitches ready to work in the opposite direction.

## 3-Needle Bind-Off

Use this technique for seaming two edges together, such as when joining a shoulder seam. Hold the edgestitches on two separate needles with right sides together.

With a third needle, knit together a stitch from the front needle with one from the back.

Repeat, knitting a stitch from the front needle with one from the back needle once more.

Slip the first stitch over the second.

Repeat knitting, a front and back pair of stitches together, then bind one off.

## Intarsia

In certain patterns there are larger areas of color within the piece. Since this type of pattern requires a new color only for that section, it is not necessary to carry the yarn back and forth across the back of the fabric. For this type of color work, use a separate ball, bobbin or "butterfly" of yarn for each color so that each color is available only where needed. In order to prevent holes when changing colors, bring the new color around the old color from beneath to twist the yarns.

## I-Cord

Using 2 double-point needles, cast on (backward loop method) number of stitches indicated. Knit, do not turn. Slip stitches back to end of needle, knit stitches. Repeat to desired length. Thread yarn through stitches to end.

## Working Short Rows

\*Work to indicated turning point, slip next st pwise to RH needle. Bring yarn to RS of work between needles, then slip same st back to LH needle. Bring yarn to WS, wrapping st.

Turn, leaving rem sts unworked, then beg working back in the other direction.

Repeat from \* until short rows are completed. If you are turning before you come to the wrapped stitch of the previous short row, you will work wraps and wrapped stitches together when the short rows are completed. If you are working past the turning point of the previous short row before wrapping and turning again, you will need to work the wrap and wrapped stitch together as you come to it.

Use the following method to work wrap and stitch together.

On knit side, insert tip of right needle into wrap, then into stitch and knit them together.

On purl side, insert tip of right needle into wrap from right side, lift it onto left needle, then purl stitch and wrap together.

## Kitchener Stitch

This method of weaving with two needles is used for the toes of socks and flat seams. To weave the edges together and form an unbroken line of stockinette stitch, divide all stitches evenly onto two knitting needles—one behind the other. Thread yarn into tapestry needle. Hold needles with wrong sides together and work from right to left as follows:

### Step 1:

Insert tapestry needle into first stitch on front needle as to purl. Draw yarn through stitch, leaving stitch on knitting needle.

### Step 2:

Insert tapestry needle into the first stitch on the back needle as to purl. Draw yarn through stitch and slip stitch off knitting needle.

### Step 3:

Insert tapestry needle into the next stitch on same (back) needle as to knit, leaving stitch on knitting needle.

### Step 4:

Insert tapestry needle into the first stitch on the front needle as to knit. Draw yarn through stitch and slip stitch off knitting needle.

### Step 5:

Insert tapestry needle into the next stitch on same (front) needle as to purl. Draw yarn through stitch, leaving stitch on knitting needle.

Repeat Steps 2 through 5 until one stitch is left on each needle. Then repeat Steps 2 and 4. Fasten off. Woven stitches should be the same size as adjacent knitted stitches.

## Knit Cast-On

Make a slip knot on the left needle.

Knit a stitch in the loop and place it on the left needle.

Repeat until you have cast on the number of stitches indicated in the pattern.

## Cable Cast-On

Make a slip knot on the left needle. Knit a stitch in the loop and place it on the left needle. Insert the right needle between the last two stitches on the left needle. Knit a stitch and place it on the left needle. Repeat until you have cast on the number of stitches indicated in the pattern.
